

W **The Window Nation Premium Entryway Collection**
Steel, Fiberglass and Storm Doors

- Decorative or clear glass – all 1” thick and thermally sealed – provides exceptional insulation while allowing natural light into your home. Features a 20-year seal failure warranty.   
- A palette of 21 paint and eight stain finishes helps reflect your style. The specially formulated industrial coatings from Sherwin-Williams are factory-applied and oven cured to ensure a hard, durable finish that will last for years. Features a ten-year warranty.  
- xGen™ high-performance glass frame withstands the punishment of weather better than competitors’ frames and features a 10-year warranty – the best in the industry. 
- Decorative door hardware made by Schlage® is protected by the Ultima™ Lifetime Anti-Tarnish warranty. Features a lifetime warranty against mechanical defects, and a Grade 1 rated deadbolt for the best residential security available. (Optional decorative hardware shown)  
- Decorative accessories including peepsites, knockers, mail or magazine slots, and kickplates are available in finishes to match lock hardware. Features a lifetime finish warranty.  
- Steel lock reinforcement plate is standard on single doors with wood jambs for added protection against forced entry. Double doors feature top steel lock reinforcement plate on door header for astragal flush bolt. 
- This Window Nation door jamb system combines the strength of solid wood with an airtight, finish-matched vinyl cover application. This allows the jamb the strength of wood with the color variety and beautiful finish of any color option. The vinyl wrapped jamb is optional on all models. Standard on all models is our primed wood jamb.  
- Your door’s solid polyurethane core is five times more energy efficient than wood and is environmentally safe. 
- Ball-bearing hinges are engineered to eliminate door sagging. The hinge finish will match your lock hardware selection.   
- Window Nation’s ENERGY STAR® certified entry doors can keep your house comfortable and help save money on utility bills.

Key Benefits:

-  Beauty
-  Energy Efficiency
-  Security
-  Durability

Sidelites and Transoms

Sidelites and transoms can dramatically expand your doorway and your decorating options. Choose from a single sidelite on either side of the door or create a “grand” entrance with dual sidelites and a matching transom.

Sidelites and transoms offer attractive options to bring in more light while creating an entryway that matches the personality of your home.

French Doors

French double door units feature two operating doors—one door active and one door passive. The passive door is secured top and bottom with a sliding steel bolt at the top that interlocks with a steel plate located in the header, and a sliding steel bolt which locks into the threshold system at the bottom.

Gardenview® Patio Doors

Your backyard or deck can be easily graced by a stylish, secure Window Nation door. Patio doors can be configured as a two-door system with one operating door and one fixed door. Three door configurations consist of one operating door and two stationary units.

Gardenview® doors are available in a variety of styles.

Gardenview® doors are available in all of the same colors and finishes as entry doors, including smooth steel, woodgrain steel and woodgrain fiberglass.

An Entryway That Suits Your Style

Fiberglass Doors

Woodgrain and Fiberglass Door Advantages

- AquaGuard™ technology protects doors against water infiltration on all sides to prevent water damage that could cause warping, delamination, rotting and the buildup of mold and mildew.
- Window Nation's molding process creates deep-profile, high-impact resistant fiberglass skins with crisp shadow lines. Surfaces are easy to clean.
- Architecturally correct stile and rail proportions creates the warmth and texture qualities of traditional wood doors with the strength and weather protection of fiberglass.
- Raised beaded molding and enhanced grain pattern provide a sophisticated, hand-crafted look compared to traditional fiberglass doors.
- Solid wood lockblock provides added reinforcement for door locks and hardware.

ELITEGrain® Fiberglass Door Advantages

- Our patented Nickel Vapor Deposition Technology produces the most authentic grain replication in high volume tooling to make ELITEGrain® the perfect wood grain door.
- Laser-precision molding process. Our process is cutting-edge technology, developed by aerospace engineers.
- When stained, ELITEGrain® looks just like a real wood door. Available in Window Nation styles specific to the ELITEGrain® Collection.
- Won't dent, crack, rot, split or warp – Our high-impact compression molded skins will not splinter, warp, or rot. Our deep profile fiberglass skins create stronger dimensions and crisper shadow lines.
- **Full-length Stiles** – Our 4" full-length hinge & lock stiles have a 1/2" oak cap that can be trimmed. The square edge design gives a true wood door appearance.
- **Composite Top & Bottom Rails** – High-strength engineered composite top & bottom rails prevent moisture from seeping into the door.
- **Polyurethane Foam Core** – The environmentally-friendly polyurethane core used in our doors provides insulation properties that are at least four times greater than wood doors.

- **Patented adjustable hinge system** allows simple adjustment of the door (5/8" up or down, 3/16" in or out) to compensate for uneven walls, natural shifts in the home or door frame, and to ensure a perfect, weather-tight seal. **Standard in ELITEGrain Fiberglass, Woodgrain Steel & Smooth Steel.** Not available in Woodgrain Fiberglass.

Steel Doors

Woodgrain and Steel Door Advantages

- Same outstanding features as smooth steel design, *plus...*
- Woodgrain steel doors feature a deeply embossed woodgrain design with a true stile and rail pattern that captures the look of a fine oak door. Window Nation's exclusive accent finishing technique ensures a realistic wood look.

Smooth Steel Door Advantages

- Strong 22-gauge hot-dipped galvanized steel door with a unitized steel perimeter for exceptional strength.
- Protective base coating ensures a beautiful finish.
- Patented adjustable hinge system allows simple adjustment of the door (5/8" up or down, 3/16" in or out) to compensate for uneven walls, natural shifts in the home or door frame, and to ensure a perfect, weather-tight seal.

Stain, Paint and Other Finishes

Ten Year Finish Warranty!

Window Nation entry doors are custom finished with specially formulated industrial coatings from Sherwin-Williams. The coatings are factory-applied and oven cured to ensure a beautiful, durable finish that will last for years.

Stain Finishes

Honey Pine Natural Oak Pecan Barrister Oak* Walnut* Weathered Oak* Colonial Cherry Mahogany*

SD=Storm Doors available in these colors as part of Window Nation Entryway Coordinated Color System, gloss finish only. The Window Nation Entryway Coordinated Color System features matching and coordinating colors among Window Nation Entry Doors, Window Nation Storm Doors, and Vinyl Wrap Jamb, but sheens are different. Window Nation Storm Doors feature high gloss finish, Window Nation Entry Doors feature low lustre finish, Vinyl Wrap Jamb feature textured finish.

*Due to possible heat build-up, the entry door warranty is voided if door is installed behind any storm door other than a Window Nation storm door.

Note: Color samples may vary slightly from the actual finishes in color or sheen due to the limitations of the printing process. Please see your sales representative for an actual sample of finishes.

Color Coordinated with Storm Doors!

COLORMAX®

Window Nation also has the exclusive COLORMAX® Custom Paint Finish Program, which expands our door finish palette across the entire Sherwin-Williams paint color spectrum. You can now choose any stock Sherwin-Williams paint color for your entryway.

The COLORMAX® system uses stock Sherwin-Williams paint color formulations – not custom-matched colors by Sherwin-Williams' stores – and will carry the same warranty as our standard paint finishes. Custom color internal muntins will not be available in the COLORMAX® system, and we do not offer custom stain finishes beyond our current stain finishes. Additional lead time is required for COLORMAX® finishes.

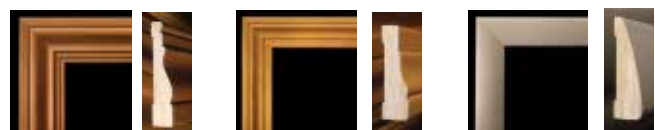

All colors match to an entry door color!

Vinyl Wrap Jamb System

No matter which door style you choose, maintenance-free vinyl-wrapped wood jambs are offered in Window Nation Entryway Coordinated Color System colors that will match your new door in every paint or stain.

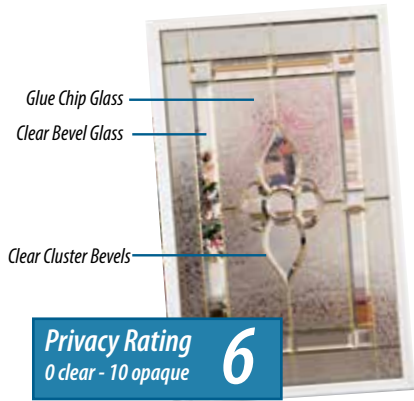

Interior Trim

Interior trim provides the picture frame for your entryway. Our solid wood trim is available in three profiles and can be factory stained or painted to match or complement your door.

eMAX ENERGY GLASS

Our eMAX Energy Glass system offers maximum energy efficiency by combining our special energy glass with dual Low-E coatings, argon gas fill, & our warm-edge spacer system. eMAX provides extra insulation in between our double-pane glass while blocking harmful UV rays, ensuring excellent energy performance!

NOTE: The eMAX Energy Glass presents a slightly darker tint, so we recommend using eMAX coating on both your door and your sidelites so the glass tint matches in all entryway components.

GUARDIAN™ Weather Barrier System

GUARDIAN™ Weather Barrier System

The Ultimate in Perimeter Protection!

In order to battle the harsh and often unexpected elements Mother Nature dispenses, you need a GUARDIAN™. Your Window Nation entry door offers the protection of the GUARDIAN™ Weather Barrier System.

Made of the toughest door components available, all engineered to work together, the GUARDIAN™ system protects your home from weather and weather-related rot and insect damage.

The GUARDIAN™ system also makes your home more comfortable and energy efficient year-round.

Anti-Wicking Barrier!

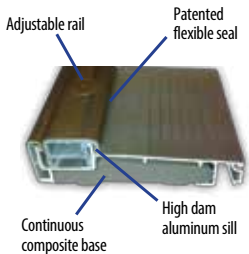

- Eastern white pine jambs are end treated with anti-wicking barrier to discourage rot and insects and offer better finish quality and durability than typical yellow pine jambs. Features a five-year warranty.

- High dam threshold features continuous composite base that will not rot or warp. Rail and nose available in light oak woodgrain or dark brown woodgrain. Aluminum sill available in brass, mill or bronze finishes.

PG40*
Performance Grade Tested

- Performance Grade Testing measures the air/water/structural load an entry door withstands when closed and locked. A PG40 rating withstands more than 50% higher water infiltration and structural loads than the industry standard ratings of PG15 and DP15.

- Adjustable composite rail with patented flexible seal interlocks with high dam aluminum sill for an impenetrable barrier between the threshold and the interior of the house. Features a five-year warranty.

- Durable Q-Lon™ compression weather stripping creates a perfect, weather-tight seal between the door and the jamb for maximum sealing against air and water infiltration.

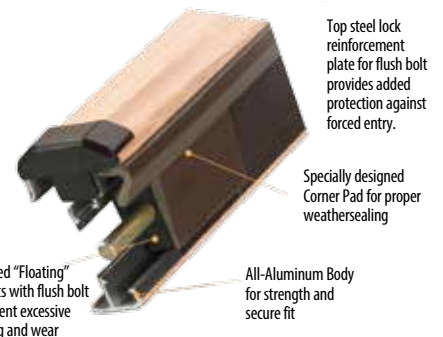

- Extended sill elevates jamb to reduce water exposure while anti-wicking wood treatment prevents water wicking.

- Tubular bulb and center fin bottom door sweep weather stripping with outer rain fin diverts water away from the door and threshold.

- Adjustable oak-look composite threshold allows simple height adjustment to create a perfect seal between the door and threshold eliminating voids or gaps that lead to water or air infiltration.

* Window Nation doors have a minimum rating of DP40/PG40. In coastal areas and areas prone to severe weather requiring a higher DP/PG rating, Window Nation doors can be constructed to meet local codes and requirements. High velocity hurricane zones are excluded.

Color Coordinated with Entry Doors!

Can be Keyed-Alike with Entry Doors!

Working Together Like A Visual Symphony

You coordinate your clothes and jewelry, you coordinate your walls and furniture, you even coordinate your bath towels. So why not coordinate your storm door and your entry door? The Coordinated Entryway System from Window Nation features matching and coordinating color palettes for your storm door and your entry door that work in perfect harmony. And, with keyed-alike locks for storm and entry doors, you'll always have the right key for the right door.

Storm Door Collections

The Window Nation Storm Door Advantage Features...

WindResist™ overlapping frame system eliminates reveals on the face of the door to block direct winds and features triple-seal weatherstripping to minimize air infiltration.

1-1/2" thick, insulated frame!

3-1/2" wide by 1-1/2" thick reinforced aluminum frame is foam-filled to insulate and provide quiet, solid operation.

Color-matched screw cap covers conceal installation hardware to provide the finishing touch with a clean, neat look.

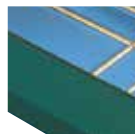

Insulated panels protect from weather!

Aluminum laminated foam panels on Harmony Collection offer excellent weather-resistance and add additional stability to the storm door.

QuikCam™ glass retention cam locks hold glass securely in place while allowing a quick and easy transition from glass to screen.

Baked on high gloss Duracron paint finish available in five coordinating Window Nation colors to match or complement the Window Nation entry door color palette.

Corsica mortised hardware features rounded overlap strike plate for smooth operation and to prevent damage to storm door frame caused by hardware contact.

Heavy-duty dual color matched closers for Allure Collection and single color matched closer for Harmony Collection will keep your storm door operating smoothly for years.

Four heavy-duty hinges assure quiet, smooth operation.

Formed steel corner gussets prevent sagging and keep storm door square in opening.

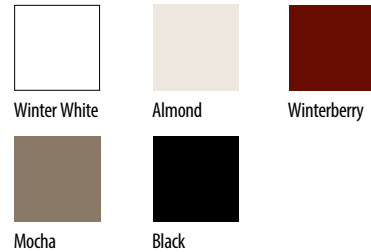

Allure Collection

Our designer storm door features decorative glass and outstanding construction details.

Screens

Standard charcoal fiberglass screens are attractive and functional. High-strength pet-resistant screens resist damage by pets. Heavy-duty fiberglass Solar Guard privacy screens are specially-designed to reduce transparency and block out heat and glare.

Tinted Glass

Available for Allure model SD-251 and Harmony model SD-221 only, tinted glass adds a touch of style to your entryway. Bronze or gray tint filters harmful UV rays and blocks out heat and glare while providing privacy.

The Window Nation Entryway Coordinated Color System features matching colors among Window Nation Entry Doors, Window Nation Storm Doors, and Vinyl Wrap Jambos but finishes are different. Window Nation Storm Doors feature high gloss finish, Window Nation Entry Doors feature low sheen finish, Vinyl Wrap Jambos feature textured finish.
